The active claims are 1-36.

Claims 1-36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicants rely on the recitation in the wherein clause for patentability. However, the claims fail to positively recite the means or steps required to achieve the desired functions set forth in the wherein clause. The claims fail to particularly point out and distinctly claim the subject matter because there are no means and steps recited for multiply sampling operating performance of modems over a period of operation of the modems.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thaweethai (USP 5,546,379) in view of Weinstein (6,035,020).

Thaweethai teaches claim limitations as set forth in the previous Office actions and in the Board decision. The only difference is that Thaweethai does not explicitly state whether the selection of modem is based on modem operating performance sampled multiply over a period of operation of the modem. Weinstein teaches a selector for selecting an available modem from a plurality of modems. From the teaching of Weinstein, it would have been obvious to a person of ordinary skill in the art to select an available modem and not a modem taken out of service in Thaweethai. It is inherent to require multiple independent samples so as to detect whether a modem is available.

Applicant's arguments with respect to claims 1, 10, 19 and 28 have been considered but are moot in view of the new ground(s) of rejection.
